REACH Registration Evaluation, Authorisation & Restriction of Chemicals

Registration, Evaluation, Authorisation & Restriction of Chemicals, or REACH, consists of a legislative framework developed by the European Union to manage the risks that chemicals may pose to human health and the environment. This framework requires industry to register chemicals used in their products with the European Chemicals Agency (ECHA)

The Knight Group does not manufacture any of the products sold, but rather distributes the products while providing value added services such as slitting, shearing, cutting to length and edge conditioning. Our suppliers continue to assess and monitor the REACH requirements as they pertain to the products we sell.

As of this date, our suppliers have determined that the products sold to the Knight Group do not contain any significant amounts of chemical compounds on the candidate list of 219 Substances of Very High Concern (SVHC). Therefore, these products are considered compliant with European Union SVHC regulations.

We will continue to work with our suppliers to determine how the REACH requirements will impact our business and will keep you informed if this situation changes.

James Needs
Group Operations and Purchasing Director
