Cut to Length

The Knight Group knows that manufacturers are under constant pressure to get their products processed faster and cheaper and stay ahead of their competitors. Space is also at a premium and many manufacturers do not have onsite facilities to store large quantities of material for processing to ensure minimal machine downtime.

By offering our customers material cut and packaged to their exact specifications, we help hundreds of our customers to achieve leaner manufacturing processes to maintain a sustainable and successful business. We have 8 cut to length lines, with multiple encoders used for multi-lane cutting of narrow materials. Operated by our skilled and experienced team, you can rely on very flat, high surface quality blanks from your chosen material, cut quickly and with great accuracy. We offer highly competitive rates to make cut to length an attractive cost and time saving decision. All material is quality checked and then carefully packed in bespoke packaging. Available for both collection or delivery to suit your business needs, your material will arrive machine ready.
