

KNIGHT GROUP

As an established supplier of both commercial and marine grades of stainless steel, nickel alloys, aluminium and titanium, the Knight Group's products are used in marine environments for a number of applications, from marine banding, bearings and wire rope through to ship building. We are a reliable partner to manufactures across the globe and can provide a fast turnaround and processing to suit, keeping the pace with a fast moving industry.

The Knight Group offers a comprehensive range of materials with chemical and mechanical properties to cope with even the harshest environments, including Nickel Alloys, Titanium, Stainless Steels, Duplex and Clad Metals. These materials provide superior corrosion resistance and mechanical strengths in the most demanding environments.

Nickel Alloys • Titanium Alloys • Stainless Steel 316 • Aluminium Alloys

MARINE

- 
Extensive Range of Quality Metals Stocked
- 
Competitive Pricing for Small and Large Quantities
- 
Bespoke Processing
3:1 Width to Thickness Ratio
- 
Global Sourcing and Delivery to Tight Deadlines

The Knight Group have established relationships with large international manufacturers, supplying large volumes with quick turnaround times. This has helping us to secure competitive pricing for manufacturers in the Marine and Subsea Sector, whether you need regular large quantities of performance metals, or small volumes to suit prototypes and small production runs.
