

KNIGHT GROUP

The relationship between Knight Group and our customers in the chemical and laser etching industry is long established. Both chemical and laser etchers have always, of necessity, demanded very high quality standards from the strip metal industry and within the Knight Group, we have met these challenging needs.

All of our materials are delivered in mint condition with an excellent clean surface quality, saving valuable manufacturing time. For precision flatness and the minimum distortion during etching, we supply tension levelled or tension annealed material and specialise in the recoiling of thin gauge metals to produce the low weight coils this industry needs. Using our precision foil blanking lines, the Knight Group can supply material as thin as 0.08mm cut to length. We also offer small quantities, ideal for prototyping. To satisfy surface quality and flatness requirements we apply the same exacting QA standard written specifically for this industry to each and every item. To ensure your products arrive to you in perfect condition, our in house export packing, including boxing for sea freight and lighter airfreight packing, has the long-term experience needed for damage free deliveries.

Premium Quality Surface • Tension Levelled & Annealed • Low Weight Coils

Extensive Range of Quality Metals Stocked

Competitive Pricing for Small and Large Quantities

Bespoke Processing
3:1 Width to Thickness Ratio

Global Sourcing and Delivery to Tight Deadlines

CHEMICAL & LASER ETCHING

Flattened and cut to length • Specialised packaging • Wide Product Range
